Dear Product Owner,

- Do you have a product or service that is being sold on your WordPress site?
- Do you want others to sell your product for you?

If you answered yes to these questions, you would want a WordPress-based affiliate system as your solution.

You see, the problem with most 3rd party affiliate systems is they don't work too well on WordPress sites.

Or if they do - they tend to be very complex WordPress affiliate scripts.

There are two obvious problems here.

You need:

1. A good strategy that makes affiliates happy by paying them generously and paying them on time.
2. A system that molds into your already existing site.

This way, as a product creator, you can focus more on marketing, getting affiliates, and creating more products.
